Professional Summary

Junior Full-Stack Web Developer with a strong foundation in front-end and back-end web development, focused on building responsive, user-friendly, and data-driven applications. Trained through structured, project-based learning with hands-on experience using modern JavaScript, React, APIs, and version control. Highly motivated, adaptable, and eager to grow within a professional development team.

Technical Skills

Front-End

- HTML5, CSS3
- JavaScript (ES6+)
- React (Hooks, State, Components)
- Tailwind CSS
- Responsive & Mobile-First Design

Back-End / Data

- REST APIs (Fetch API)
- Basic API Integration & Error Handling
- Local Storage & Data Persistence
- JSON Data Handling

Tools & Workflow

- Git & GitHub
- VS Code
- Browser DevTools
- Windows OS

Projects & Practical Experience

Full-Stack & Front-End Projects | CodeSpace Academy

2024 – 2025

- Built responsive web applications using HTML, CSS, JavaScript, and React.
- Integrated third-party APIs to fetch and display dynamic data.
- Implemented application state management, routing, and reusable components.
- Applied mobile-first and UX principles to improve usability and accessibility.
- Debugged, tested, and refactored code to improve performance and readability.
- Used Git and GitHub for version control and project submissions.

Notable Projects: - **Podcast App (React):** Data fetching, global audio player, UI state management. - **Book Connect App:** Search, pagination, filtering, and theme customization. - **Agile Board App:** Task management, bug fixing, and local storage persistence.
